Journal Application Form

Before you start

Read our [information for publishers](#), review your website and make sure that your journal fulfills all the criteria.

Guides to completing the form are also [available in other languages](#) (العربية, 中文, فارسی, Français, Italiano, Polski, Português, Русский, Română, Español, Türkçe, Українська).

DISCLAIMER

The applicant is responsible for providing accurate information when submitting an application for consideration. If the information provided is not sufficient or is incomplete, the application will not be considered. In cases where the information provided is found to be untrue—either during reviewing or even after admission—we reserve the right to reject or remove the journal with immediate effect and to not accept new applications for a period of 1 year. In cases where a single publisher has submitted more than 5 applications with false information, we reserve the right to remove all of the publisher's journals and to not accept any more applications for a maximum period of 3 years, depending on the number of journals for which false information was provided and the eventual number of repeated incidents.

Basic Journal Information

1) Journal Title *

2) URL *

3) Alternative Title

4) Journal ISSN (print version) *

Only provide the print ISSN if your journal has one, otherwise leave this field blank. Write the ISSN with the hyphen "-" e.g. 1234-4321.

5) Journal ISSN (online version) *

Cannot be the same as the P-ISSN. Write the E-ISSN with the hyphen "-" e.g. 1234-4321.

6) Publisher *

7) Society or Institution

Quality and Transparency of the Editorial Process

36) What is the URL for the Editorial Board page? *

A journal must have an editor and an editorial board. Only in the case of Arts and Humanities journals we will accept a form of editorial review using only two editors and no editorial board. Where an editorial board present, at least 5 of its members must be clearly identifiable with their affiliation information.

37) Please select the review process for papers *

38) Enter the URL where this information can be found *

This field is optional if you have selected "None" above.

39) What is the URL for the journal's Aims & Scope *

40) What is the URL for the

[Research4Life](#)  is central to our goal of achieving universal access to scientific, technical and medical research information. As a unique public-private partnership between UN agencies, universities, and publishers, it reduces the knowledge gap between developing and industrialized countries with free and low cost access to critical scientific research.

[Our programs](#)[Videos](#)[Librarian without borders](#)[Telling the stories](#)

Our programs

For free or at low cost to institutions in the developing world

Research4Life has four main programs – HINARI, AGORA, OARE, ARDI – that provide research for free or at low cost to institutions in the developing world. Our goal is to foster a strong and independent research culture in the developing world – one that is fully integrated into the international research community with sustainable economic development and enhanced quality of life.

Handle.Net Registry (HNR)

run by Corporation for National Research Initiatives (CNRI)

The Handle.Net Registry will allot prefixes of the form "20.500" followed by four or more digits (i.e., 20.500.1234).

Users who are allotted a prefix from the HNR will have their associated prefix handle records registered with the HNR to enable HDL.NET resolution services for their identifiers.

<http://www.handle.net/>

Archival Resource Key (ARK)

The Archival Resource Key (ARK) system is location and protocol independent and is a new approach to persistent identification.

It was developed in 2001 by John Kunze for custodians of archived digital objects, and emphasises the principle of stewardship of resources and their naming schemes over time.

The ARK identifier is a naming scheme for persistent access to digital objects (*including images, texts, data sets, and finding aids*) implemented by the California Digital Library (CDL).

SHERPA RoMEO

an online resource that aggregates and analyses publisher **open access policies** from around the world

If an academic author wants to put their research articles on-line, they are faced with an increasingly complex situation.

Authors can be left confused: **RoMEO helps to clarify** the situation.

RoMEO's own database covers over 22,000 journals. RoMEO also searches the *Zetoc*, **DOAJ**, and *Entrez* databases for additional journals.

The qualifiers for the DOAJ Seal

DOAJ promotes best practice in Open Access publishing. To highlight journals that adhere to best practices, we have created the 'DOAJ Seal for Open Access Journals'.

The qualifiers for the Seal highlight features related to accessibility, openness, discoverability, reuse and author rights and have nothing to do with the scholarly quality of the papers published.

To qualify for the Seal the journal must:

1. have [an archival arrangement in place](#) with an external party (Question 25). 'No policy in place' does not qualify for the Seal.
2. provide [permanent identifiers](#) in the papers published (Question 28). 'None' does not qualify for the Seal.
3. provide [article level metadata](#) to DOAJ (Question 29). 'No' or failure to provide metadata within 3 months do not qualify for the Seal.
4. embed [machine-readable CC licensing information](#) in article level metadata (Question 45). 'No' does not qualify for the Seal.
5. allow [reuse and remixing of content](#) in accordance with a CC BY, CC BY-SA or CC BY-NC license (Question 47). If CC BY-ND, CC BY-NC-ND, 'No' or 'Other' is selected the journal will not qualify for the Seal.
6. have [a deposit policy registered](#) in a deposit policy directory. (Question 51) 'No' does not qualify for the Seal.
7. allow [the author to hold the copyright without restrictions](#). (Question 52) 'No' does not qualify for the Seal.

Seal...just

3. The DOAJ Seal

The DOAJ Seal, think of it like this: journals that have the Seal are journals that adhere to outstanding best practice; journals that don't have the Seal are good, trusted journals adhering to best practice. The Seal has been allocated to a handful of journals accepted into DOAJ since 2014. Journals that are awarded the Seal have answered 'Yes' to 7 questions that DOAJ has chosen specifically as indicators of an extra high and clear commitment to open access best practices, of extra high levels of commitment to publishing technologies, and the most 'open' form of open access. Importantly, the journals that DO NOT have the Seal still adhere to high levels of quality required for indexing in the DOAJ, especially those journals that have a green tick. ***No Seal DOES NOT mean low quality, non peer reviewed, questionable, 'dodgy', 'scammy'.***

Assessed by up to four different members of the DOAJ Team

Managing Editor: will review the application and assign it to an Editor Group. Post review, the **Managing Editor will make the final decision on whether to accept or reject your application.** A Managing Editor may decide to reject an application without further review, especially if the application that you have submitted is incomplete. **You will be notified.**

Editor: will assign the application to an Associate Editor. Post review, the Editor **will double check** the Associate Editor's recommendations.

Associate Editor: will carry out the review of your application and **will email you to ask questions**, if necessary. The Associate Editor will make a 'reject' or 'accept' recommendation.

If your application is accepted

Upon acceptance into DOAJ, the journal is classified by subject and assigned an LCC code by the DOAJ team.

- 1) An **automatic confirmation email** is sent to the Journal Contact (this may be different to the Applicant).
- 2) A second email is sent that contains **details on how to log in** to your Publisher account.

You will need these details to upload article metadata. The journal is then visible in DOAJ immediately.

If you do not get your email, check your Spam folder before contacting us. Your journal may have been added to an existing account in which case no email is sent.

If your application is rejected

If your application is rejected, a member of the DOAJ team will let you know, along with **the reason(s) for the rejection**.

A rejected journal may apply again for inclusion, **usually after 6 months**, unless otherwise stated, and once it has demonstrated clearly that it meets all of the requirements stated on this page.

Applications submitted before the end of the stated period will be automatically rejected.

Common reasons for rejection are:

- One of the most common reasons for rejection is that we receive **no response to our emails**.
- We will automatically reject the application after 1 month.
- Please be sure to check your Spam folder frequently and be aware that the Associate Editor who is **reviewing your application is a volunteer** and will not be emailing you from a doaj.org email address.

Common reasons for rejection are:

- **no response** from the applicant
- incomplete or **incorrect ISSN** information
- incomplete application
- every URL in the application form is identical
- **duplicate application**
- journal does not adhere to the **Principles of Transparency** and Best Practice in Scholarly Publishing
- journal does not fulfil the basic requirements listed on this page
- journal is not open access
- journal does **not publish original research**
